PROFILE

Computer Science undergraduate with hands-on experience building applications and projects. Focused on writing clean, maintainable code and improving through iteration.

EDUCATION

Amrita Vishwa Vidyapeetham

B.Tech in Computer Science and Engineering

- CGPA: 8.78 / 10.0

Vidhyasagar International Public School

Senior Secondary

- Percentage: 94%

Coimbatore, Tamil Nadu

Aug. 2023 – May 2027

Tiruppur, Tamil Nadu

April 2022 – April 2023

PROJECTS

GemChef

February 2026

- Built a kitchen assistant web app that uses Gemini Vision to identify ingredients from images and suggest recipes based on what is available.
- Added a weekly meal planner that generates a grocery list based on selected recipes and implemented step-by-step cooking guidance with dietary filters for conditions like diabetes and allergies.
- Developed a Cook-Along feature that extracts structured recipes from YouTube video URLs using AI, syncing ingredients and steps for hands free cooking.
- Built with: Next.js, TypeScript, Google Gemini API

Amazon Intent

June 2026

- Built an AI-first quick-commerce platform for Amazon HackOn that transforms multimodal user intents (voice, text, image scans) into fully populated, actionable shopping carts in seconds.
- Implemented context-aware shopping modes (Occasion, Recipe, Guide Me) that utilize LLMs to curate relevant products, calculate serving-aware quantities, and present explainable purchasing decisions.
- Designed an AI pipeline using a multi-provider fallback chain (Gemini, Groq), near zero-downtime cart curation.
- Built With: Next.js 14, React, TypeScript, Tailwind CSS, Google Gemini, Zustand

Campus Resource Engine

February 2026

- Built a room booking system with real-time availability updates and implemented QR-based check-in to automatically cancel no-show bookings, freeing up unused slots.
- Added a user reliability score that adjusts booking limits based on past booking behaviour.
- Developed an admin dashboard with RBAC for managing users, rooms, and bookings, featuring demand-forecast heatmaps, utilization reports, no-show tracking, audit logs, emergency overrides, and broadcast notifications.
- Built With: Next.js, TypeScript, Supabase, Socket.io

StudSync

September 2025

- Developed a cross-platform student management app with timetable tracking, academic calendar, and real-time updates using Firestore.
- Implemented Firebase authentication and deployed the web version on Vercel.
- Built With: Flutter, Dart, Firebase, Firestore

HACKATHONS

HackOn with Amazon

June 2026

- Built Amazon Intent, an AI-powered quick-commerce platform that transforms multimodal user intents (voice, text, images) into actionable shopping carts.

Gemini Global Hackathon

February 2026

- Built GemChef, an AI-powered kitchen and meal planning assistant using Gemini Vision API.

TECHNICAL SKILLS

Languages: Python, C/C++, Java, SQL (MySQL, PostgreSQL), TypeScript, JavaScript, Dart

Frameworks: Next.js, React, Flutter, Tailwind CSS

Core Computer Science: Data Structures, DBMS, OOPS

Tools & Platforms: Git, Docker, Firebase, Supabase, Vercel, Render, Railway, VS Code

Soft Skills: Leadership, Collaboration, Problem Solving, Public Speaking
